This proposal includes data that shall not be disclosed outside the Government and shall not be duplicated, used, or disclosed—in whole or in part—for any purpose other than to evaluate this proposal. If, however, a contract is awarded to this offeror as a result of—or in connection with—the submission of this data, the Government shall have the right to duplicate, use, or disclose the data to the extent provided in the resulting contract. This restriction does not limit the Government's right to use information contained in this data if it is obtained from another source without restriction.

Reference: Request for Final Proposal Revision #QTA0015THA3003 for the Enterprise Infrastructure Solutions (EIS)

Dear Mr. Horan and Ms. Borba:

MicroTech is pleased to submit our response to the GSA Request for Final Proposal Revision for the Enterprise Infrastructure Solutions.

As one of the Federal Government's most successful Minority-Owned Small Businesses and certified and verified Service-Disabled Veteran-Owned Small Businesses (SDVOSB), MicroTech is excited about this opportunity and our ability to provide what we believe will be one, if not the only Small Business proposal for the EIS contract. As a telecom and network solutions provider for the Federal Government since 2004, MicroTech has put together a stellar team of successful and globally recognized industry leading telecommunications and information technology (IT) infrastructure services firms, including four Fortune Global 500 companies, to support our EIS efforts. MicroTech has assembled a truly global team that has the capability to provide all the mandatory and a large majority of the optional services across the United States and around the world.

As a past and present holder of over 30 IDIQ and GWAC contracts, including the \$5B Veterans Technology Services (VETS) contract, the Air Force's \$5.8B NETCENTS-2 Network Operations and Infrastructure contract, and the Army's \$400M Information Technology Services – Small Business (ITS-SB) contract, MicroTech is highly experienced in managing large teams of large business subcontractors. We have successfully managed IBM, Microsoft, AT&T, Dell Motorola, Time Warner and other large companies to provide a wide-range of IT and telecommunications services to the Government. As an International Organization for Standardization (ISO) 9001:2008-certified, ISO/IEC 20000-1:2011-certified, and 27001:2013-certified company as well as Capability Maturity Model Integration (CMMI) Maturity Level (ML) 3 Appraised for both Services and Development, MicroTech is a leading force for best practices in telecom and information technology (IT) infrastructure services and solution delivery. These certifications and ratings emphasize process improvement and better ensure customer focus, cost control, agility in adapting to change, and resource maximization supporting telecommunications and information technology (IT) infrastructure services requirements.

A Service-Disabled Veteran-Owned Small Business

8330 Boone Boulevard, Suite 600, Vienna, VA 22182 Voice (703) 891-1073 Fax (703) 891-1074
