Comcast Business Announces Multi-Million Dollar Investment to Expand High-Performance Ethernet Network in Arlington and Alexandria

Businesses Will Benefit from Scalable, Advanced Internet and Voice Capabilities

Arlington, VA – May 2, 2018 – [Comcast Business](#) today announced a multi-million dollar investment in the expansion of its fiber-based network in Arlington and Alexandria, reaching more than 350 additional businesses directly and benefiting hundreds more by making the network more accessible. Capable of delivering up to 100 Gigabits-per-second (Gbps) of network capacity, the fiber optic Ethernet network expansion supports advanced services and gives Comcast Business the ability to give new customers, ranging from small and medium-sized organizations to large enterprises, quick access to its network.

While the Comcast Business network already serves many of Arlington and Alexandria's largest companies and hundreds of businesses, this expansion has deployed additional miles of new fiber in and near downtown Arlington and Alexandria, bringing high-performance Ethernet, Internet and advanced voice solutions to more businesses and organizations.

"As demand for our high-performance Ethernet offerings continues to soar, we're proud to bring our advanced network deeper into the area to help the economic growth of these cities and the region," said Mary McLaughlin, regional senior vice president for Comcast. "We've invested heavily in building an infrastructure that meets the high-speed, high-capacity needs of business, technology, healthcare and education customers across Arlington and Alexandria, and we look forward to continuing to launch new and innovative services that exceed their expectations well into the future."

The Ethernet extensions, which are both aerial and underground, include downtown buildouts in North Arlington along Washington and Wilson Boulevards, Ballston, Crystal City and Pentagon City in Arlington; and the City of Alexandria, including Old Town and the Route 1 corridor in Alexandria.

"Comcast's continued investment in Arlington to provide the latest network technology and cutting edge products plays a major role in the success of our businesses, and the services they provide to our surrounding community," said Kate Bates, President and CEO of the Arlington Chamber of Commerce. "We commend Comcast for making such an important commitment to keeping Arlington at the forefront of innovation."

Comcast Business serves 20 of the nation's top 25 markets and is one of the fastest-growing Ethernet providers in the nation. With a comprehensive portfolio of Ethernet options, Comcast Business serves businesses and organizations with distributed enterprises that require large amounts of bandwidth, are looking to link multiple sites or branch locations or plan to connect their offices to a third-party data center. Nationally, Comcast Business's Ethernet services are delivered over an advanced network that spans more than 153,000 miles. Comcast Business customers thus remain on an advanced network that is quickly scalable and privately managed by an experienced team.

About Comcast Business
