Comcast Business Recognized in 2022 Gartner® Magic Quadrant™ for Managed Network Services

PHILADELPHIA – December 13, 2022 – Comcast Business today announced it has been recognized in the 2022 Gartner Magic Quadrant for Managed Network Services. This marks the first time Comcast Business has been recognized in a Gartner Magic Quadrant and we believe it further validates the Company as a leading global provider of managed network solutions with strengths serving highly distributed enterprises across a variety of vertical markets.

The Gartner Magic Quadrant for Managed Network Services evaluates a service provider's vision in the market and their ability to execute their services effectively against Gartner view of the market. As enterprises seek to balance cost optimization, agility and performance, the Gartner Magic Quadrant provides insights for navigating the expanding managed network services market.

We believe, Comcast Business' inclusion on the Gartner Magic Quadrant provides hard-earned validation that Comcast Business is a global solutions provider for managed network services. The [acquisition of Masergy](#) has enabled the company to quickly become a provider of global secure connectivity and intelligent networking services.

"Comcast Business Managed Network Solutions provide the foundation for fast, scalable, and secure always-on connectivity for the modern enterprise," said Bob Victor, Senior Vice President, Customer Solutions, Comcast Business. "We believe this Gartner recognition validates Comcast Business's vision and our ability to execute globally and reinforces the confidence enterprises feel in partnering with us for their local, national and global managed networking needs. We are committed to investing in partnerships, services, technologies, and operations that scale to serve enterprises of all sizes."

The report evaluates critical capabilities of providers based on use cases related to multicarrier WAN environments, MNS competency, MNS for LAN/WAN, Cloud and Remote work, as well as recent customer reviews. Such capabilities are critical for today's enterprises that need to support heavy cloud and remote work end users, complex WAN environments, and multiple connectivity providers. The Magic Quadrant for Managed Network Services considers both traditional enterprise networking as well as "transformational networking technologies" that will help enable enterprises to deliver on future business and end user needs.

Gartner Magic Quadrant reports are a culmination of rigorous, fact-based research in specific markets, providing a wide-angle view of the relative positions of the providers in markets where growth is high and provider differentiation is distinct. Providers are positioned into four quadrants: Leaders, Challengers, Visionaries and Niche Players.
