Clean Earth Selects Comcast Business for Connectivity Solutions

Leader in specialty waste management leverages Ethernet Dedicated Internet to support customer-first approach to waste management

PHILADELPHIA, PA – MAY 30, 2024 – Comcast Business today announced it is providing Clean Earth, a division of Enviri Corporation and a leading provider of environmental and regulated waste management services, with Comcast Business Ethernet Dedicated Internet at all 91 of its locations throughout the United States. The solution provides reliability and network redundancy for Clean Earth, serving as a technological backbone to support the company's growing operations, continued expansion, and customer-first approach.

Clean Earth is one of the largest specialty waste companies in the United States, providing remediation, disposal, recycling, and beneficial reuse solutions for hazardous and non-hazardous waste, electronic and battery waste, and contaminated soil and dredged materials. Clean Earth's vast portfolio of technologies and services touches nearly every industry that generates waste including energy, infrastructure, commercial, industrial, manufacturing, retail, and healthcare markets. As a company that is constantly expanding and evolving, its technology needs are also growing.

"It is crucial at Clean Earth to secure a trustworthy, unified connectivity provider for service consolidation," said Madhu Annagiri, Clean Earth's Vice President of Information Technology. "Comcast Business has expertly navigated Clean Earth's technological journey and helped us achieve our long-desired network performance benchmarks. The reliable connectivity provided by Comcast Business has helped Clean Earth to deliver unparalleled recycling solutions to its customers."

Clean Earth helps its customers recycle or reuse more than 8.7 billion pounds of waste per year, and the applications it utilizes to process waste, manage orders, and track the status of where waste is moving are all hosted in the cloud and in private data centers. The company turned to Comcast Business for expanded support and technical expertise, to achieve reliability and network redundancy.

"A rapidly growing business such as Clean Earth requires advanced technological support and reliability across all its locations," said Dan Carr, Vice President of Comcast Business for Comcast's Beltway Region. "With Comcast Business' EDI connectivity solution, Clean Earth employees will enjoy fast speeds, capable of tackling the demands of high-bandwidth applications and helping them stay connected and productive."

Comcast Business Ethernet Dedicated Internet is a carrier-grade solution to connect wired devices with reliable response times to help business remain fast and flexible.
