

Comcast Business Delivers Advanced Technology Infrastructure at Levi's® Stadium, Powering the Fan Experience and Stadium Operations

Reliable connectivity backbone supports broadcast-quality in-venue experiences, real-time operations, and next-generation venue technology

PHILADELPHIA – May 27, 2026 – Comcast Business today detailed the advanced network infrastructure it has deployed at Levi's® Stadium, home of the San Francisco 49ers – one of the most technologically-enabled venues in professional sports. The network underpins the high-performance connectivity required for immersive fan experiences, seamless operations, and large-scale live event production.

Through its ongoing collaboration with the 49ers, Comcast Business has helped enhance the stadium's connectivity backbone. The infrastructure is engineered to handle the data demands of high-density WiFi usage, mobile engagement, and next-generation in-venue technology – simultaneously, at scale.

Comcast Business provides end-to-end connectivity across Levi's® Stadium – high-capacity dedicated internet, redundant fiber architecture, advanced voice solutions, and stadium-wide WiFi presented by Xfinity – all engineered to work together like a single, unified system. This foundation enables critical operations throughout the venue, from mobile ticketing and frictionless concessions to real-time analytics in the stadium's command center.

These capabilities support broader innovations across Levi's® Stadium, including advanced 4K video production and one of the largest outdoor 4K video board deployments in professional sports – systems that require resilient, high-bandwidth connectivity to perform at broadcast-quality.

“Delivering a world-class experience for 70,000 fans starts with connectivity you can depend on,” said Costa Kladianos, San Francisco 49ers Executive Vice President and Head of Technology. “As we continue to transform Levi's® Stadium into an Intelligent Stadium that exceeds our fans' expectations, it is crucial to have bandwidth that is not only built for our current needs but for the future of the fan experience. Comcast Business gives us the reliability and scale to keep pushing what's possible.”

For fans, that translates into fast, reliable connectivity for streaming, sharing, and engaging with digital experiences throughout the stadium. For operators, it enables more informed, real-time decision-making and reliable performance at scale across events of any size.

“Today's stadiums operate as technology platforms as much as they do sports and entertainment venues,” said Christian Nascimento, SVP Connectivity and Digital Customer

Solutions, Comcast Business. “Our work with the 49ers demonstrates how we partner with leading organizations to deliver scalable connectivity that performs under pressure and enhances every aspect of the experience for fans and operators.”

Comcast Business partners with many of the most recognized sports and entertainment organizations, delivering enterprise-grade connectivity solutions – from multi-gig fiber networks to advanced cybersecurity and managed services – for modern, high-performance venues. The 49ers partnership is among a growing portfolio of major venues where Comcast Business serves as the integrated technology partner for live events at scale.

About Comcast Business

Comcast Business offers leading global businesses the technology solutions and forward-thinking partnership they need. With a full suite of solutions including fast, reliable connectivity, secure networking solutions and advanced cybersecurity and a range of managed service options, Comcast Business is ready to meet the needs of businesses of all sizes. Comcast Business has been recognized by leading analyst firms for its continued growth, innovation, and leadership, and is committed to partnering with customers to help them drive their businesses forward.
